### President's Comments:

What a pleasing result of our A.G.M. Firstly thank you for your confidence in returning Jean and I for the leadership, but thank you most sincerely for the three new faces at our first Committee meeting. Thanks also to those who have served, but for personal reasons could not re-nominate. It was a real pleasure to have those three new recruits with the possibility of another, joining us to spark new life into the Society. We can look forward to a glowing year. and no doubt, many more to follow. Unfortunately we are still short of a Treasurer, although we have an Assistant who will "carry on" until.....Should any member contemplate taking on this duty, but feel inadequate, please do not hesitate to discuss this with me. I have previously assisted treasurers and would happily do so again, but will not be hampered with the several other miscellaneous projects which Charles undertook.

Our next event looks like exceeding previous end of year Novice functions with, I believe, more than ninety listed to attend. Should be a great welcome to usher in the "Christmas Season." The ensuing break until January will give us a chance to catch up on those jobs that we keep postponing, due to "too hot" or "too busy" or just too..... Sorry about the mix-up with our 2013 Autumn Show – just shows you should not select dates without a full calendar aboard. Unfortunately the changed date which I discussed at last meeting is also impossible. Because of time running out I have made a presidential decision, after discussion with a couple of leading growers, to hold the show on 5-6-7 April which is after Easter, and before the Herbert River Orchid Society Field Day. We'll select the show dates for 2014 somewhat earlier in the coming year. I still think our Field Day was one of our best ever, and quite a number of people I have spoken to agree, even though one or two knockers see it otherwise. Considering the few who organised it, and the early shortage of open

shade houses, I consider it was a resounding success. Any comments would be welcome.

Just before I close and wish you all the compliments of the season, a reminder of the Management Committee vacancies.

**Two** Vice Presidents; Treasurer; Assistant Secretary; Technical Adviser. Volunteers would be strongly considered.

Our General Meeting on 23 November, (the last for the year) will be short and followed by an exceedingly long Tea Break – a plate of goodies would be welcome. Then two days later the Novice Group "Break-Up – Christmas Luncheon."

Should we miss you in the meantime Jean and I wish you all "Compliments of the Season" and look forward to seeing you at the January meeting.

Wal Nicholson

### Novice/New Growers Report:

On Sunday 28<sup>th</sup> October, 66 members of this group met at the Townsville Orchid Society Inc. Hall, Charles Street, Kirwan for their usual monthly meeting. These meetings have always been well attended and everybody who attends will all try to help one another with their individual problems, which is very encouraging to all new growers. I am sure everybody who attended our meeting thoroughly enjoyed Delia's talk on the way she grows her *Peristeria* (Dove Orchid). This species is terrestrial which has large egg-shaped pseudo-bulbs and folded stalked leaves with 10-12 fragrant 50mm flowers borne on 1.2m long stems. Also on display was Jeff's plant *Dendrobium crumenatum* (Pigeon Orchid) which has pseudo-bulbs swollen in the middle. About 9 days after sudden drop in

temperature, such as accompanies a heavy rain shower, all affect flower buds open which will stay open only for one day. We would like to thank Delia for explaining to the members the different characteristic of these two orchid plants and for her time and knowledge on this subject. Ray Robinson had a *Bulbophyllum fletcherianum* in flower at the meeting and so he had a little story to tell on how he first obtained this orchid many years ago. In 1985 he was given a seed pod to flask and by chance he was able to germinate two seedlings from this procedure. After many years of careful care and attention, he has now a flower on this plant for the very first time in 2012. Wal Carlill and Peter Cooper were kind enough to donate a couple of overgrown pots of *Oncidium sphacelatum* which were divided up into several plants and placed on the Multi Raffle Table for the afternoon raffle. Your generosity was greatly appreciated and we thank you both Wal and Peter. It was also mentioned to be vigilant and to regularly inspect your plants for any insects (Orchid Beetle etc,) as they can introduce lots of damage in your shade houses. Healthy plants and a clean work environment will solve a

lot of your problems.

An excellent display of flowering plants was benched for our Popular Voting Competition and the winners in the Novice Section were Janeen Deliseo & Frank Ostrowski 1<sup>st</sup>, with Peter Lucke 2<sup>nd</sup> & 3<sup>rd</sup>. In the Open Section, Wal & Lyn Carlill was 1<sup>st</sup> with Norma Palin placed 2<sup>nd</sup> & 3<sup>rd</sup>. Our Christmas Luncheon will be at the Townsville Orchid Society Inc. Hall on Sunday 25<sup>th</sup> November starting at 12 noon. We will be needing lots of gifts for our huge Multi Raffle Table also any small items of grocery to put into the grocery buckets would be greatly accepted. Please remember also to turn up if you have put your name down to attend this function. We have to pay for all the meals that we nominate. The members who will be attending, this number has to be given to the Caterer by Tuesday 20<sup>th</sup> November. Clara and Warren would like to thank you for all your wonderful support you gave to us throughout the past year and to wish all a very Happy Christmas with your families and friends.

Warren & Clara

### In Noel's Bush House 9

Neofinetiafalcata (Thunberg)Hu 1925

Ascofinetia Cherry Blossom

#### *Neofinetia falcata* (Thunberg) Hu 1925

This delightful compact vandaceous orchid is found in Japan, Korea and China. It was introduced to the West from Japan by Carl Peter Thunberg in 1784, and placed in the genus *Orchis*. In 1925 H. H. Hu created *Neofinetia* as a monotypic genus. The genus is named in honor of Achille Finet, a French botanist who worked with the orchids of Japan and China in the late 1800s. The Greek prefix *neo* (new) was added to distinguish it from another plant genus (not an orchid) named earlier to honour Finet. *Neofinetia falcata* remained the only species in the genus until Eric Christenson discovered *Neofinetia richardsiana* in 1996. Another species, *Neofinetia xichangensis*, has also since been named, but there is some controversy over whether it is a true species or a larger form of *Neo. richardsiana*.

*Neofinetia falcata* has a long history (more than 400 years) in Japan, being associated in early years with Samurai culture. It is called “Fu-ran” (the Wind Orchid) or “Fuki-ran” (Rich and Noble Orchid) and many different varieties are cultivated.

It grows well for me in Townsville, although it is described as a cool to temperate grower. The Japanese grow it on a tightly-packed mound of sphagnum moss (in a fancy pot for presentation) but it seems quite cheerful growing here potted in river rocks, without any sphagnum moss. It readily sets new growths, so I am looking forward to stunning displays in the future.

There are many popular hybrids made with *Neofinetia falcata*, some of the more well-known being *Ascofinetia* (x *Ascozentrum*, e.g. *Ascf. Cherry Blossom* [shown here]), *Neostylis* (x *Rhynchostylis*, e.g. *Neost. Lou Sneary*) and the complex hybrid *Rumrillara* (x *Ascozentrum* x *Rhynchostylis*, e.g. *Rlla. Margaret’s Jewels*). I like them and want more.

## Royal Orchids

‘Nambawan pikinini bilong miss kwin’, Prince Charles and his wife Camilla recently visited Papua New Guinea and while in Port Moresby at the National Capital Botanical Gardens, Camilla was presented with an orchid named in her honour – *Dendrobium Camilla*. I have been unable to find a photo of this orchid (or its parentage – yes, I have failed you), but I saw Camilla and the orchid on television, and it is a large ‘antelope’ type dendrobium.

In other royal news, Prince William and Catherine visited Singapore in early September and were presented with *Vanda William Catherine* (V. *First and Last* x V. *Motes Toledo Blue*), named by the Singapore Botanical Gardens in their honour. They were also shown an orchid named in 1971 after William’s mother – *Dendrobium Memoria Princess Diana* (Den. *Pattaya Beauty* x Den. *Fairy Wong*).
