### **President's Comments:**

You're probably tired of me saying that this is written before the show, but will be received after it, so I won't say it this time. However, thank you all who contributed, and to those who took off the prizes.

As always, this near to the show, I keep hearing "nobody has any flowers" to which I respond "we hear that at every show." I have several flowering *Rhynchostylis*, so others would have them, and my *Ludisia* – *Haemaria* – Jewel Orchid – are overflowing with buds – fingers are crossed. But there are many others.

Enough about the show. After many years of "flying the flag" for Townsville Orchid Society Inc. at many local functions – particularly the Senior's Expo (formerly Picnic in the Park), Jean and I have decided if nobody else, particularly younger members, are interested then we will give it a miss. We were very well received, and encouraged many to attend our shows, but we can't neglect our personal lives for ever in favour of T.O.S. Inc., if other members aren't interested.

Weight Watchers no longer hold meetings on Fridays at our hall, so we have Thursdays and Fridays available for other purposes. At our recent Committee meeting ideas were put forward for changes to our operations.

For some time attendances at our General meetings on the fourth Friday night have been falling away, due to reluctance to drive at night – Friday night football on T.V. – Basketball and sometimes boring meetings, so the following suggestions have been made for your consideration. Decisions will be made at the August meeting, or maybe at October after we return from Africa (W.O.C).

The suggestion – change the Friday meeting to just a business meeting – Minutes – Correspondence – Finance – future plans Etc. Maybe change it to Thursday night – skip the usual committee meetings as it would become superfluous – no tabled plants or guest speaker.

Sunday's Novice/New Growers meeting to become General Meeting but with no mundane business. Flowering plants to be tabled (as is done now at Friday's General Meeting). This would be subject to judging arrangements. Sunday's meeting would be virtually unchanged except for more tabled plants and judging.

It's your Society, so let's hear your feedback!?? You may have a much more brilliant idea. Many groups have wished to hire the hall on a regular basis for Thursday or Friday, so there are many alternatives.

The dinner – well it's on in a few days and just after the show, with more than sixty listed to attend. Please bring goods for the raffle table. Happy Growing and showing.

Wal

### **Novice/New Growers Group Report**

On the 29<sup>th</sup> June, the Novice/New Growers Meeting opened with 71 members standing to observe a one minute silence in memory of the late Ross MacIntyre, who passed away on the 12<sup>th</sup> June. Ross was a well known and respected member of the Townsville Orchid Society Inc. who was always willing to help out at our monthly meetings and Orchid Shows. Our sincere condolences go out to Joan and her family at this sad occasion. We all know that the members of our society and members of other Clubs and Societies who knew Ross will also surely miss him too. May he rest in peace.

The main topic for our proceedings was a talk given by Charlie Truscott on the Control of Red Spider and False Spider mites on our Orchids. His Research and Presentation on this subject along with the slide show and commentary was incredible and his willingness to impart his knowledge gained over many years of growing orchids. His detailed explanation on (1) How to identify the problem mites (2) Their life cycle (3) Implementing the correct control and timing (4) Recognising the presence of spider mites through leaves (5) Using chemical control measures (6) Biological control (7) Home remedies and most importantly to practice prevention and to monitor your plants regularly in your orchid house. Maybe with all this information that Charlie has so kindly given to us on the Red spider and False spider mites, we should at least try to eradicate or at least limit the spread of these pests in our orchid house.

Thank you Charlie for your time and expertise on this subject which I know was greatly appreciated by all our members at this meeting.

The Popular Voting results in the Novice Section were as follows:- Eric & Robyn Dundas 1<sup>st</sup>, 2<sup>nd</sup> & 3<sup>rd</sup>. and in the Open Section:- 1<sup>st</sup> Place Keith & Lyn Chambers, a tie between Wal & Lyn Carlill and Maureen Soper for 2<sup>nd</sup> Place with Keith & Lyn Chambers 3<sup>rd</sup>.

By the time you receive your July Bulletin our Winter Show will well and truly be over and I hope and trust you all gave it your best shot and supported the show with lots of flowers and helped out on the show roster. It was great to see Ray Robinson back at our last meeting and his generous help to members with their queries on orchid plant names.

Once again we have to thank everybody for the cake and sandwiches you brought along for the afternoon tea table and your generous donations of gifts on the Multi Raffle Table and the purchasing of Raffle tickets.

## In Noel's Bush House 25

*Caularthron bicornutum* [Hooker] Raf. 1836. Previously called *Diacrium bicornutum*

This delightful orchid is a welcome sight in winter, when so few others are in bloom. It is a cheerful orchid, with the flowers a brilliant white, nicely contrasted by the markings on the lip. It is native to tropical South America, extending as far south as northern Brazil, and is also found on the islands of Trinidad and Tobago. Because of its clear white colour, it is known as the Virgin Orchid, or the Virgin Mary Orchid.

The name "Caularthron" means "Articulated Stem", referring to the internodes displayed on the older pseudobulbs when the leaves fall off, and "bicornutum" means "two-horned" – the base of the lip has two horn-shaped calluses. Ants are often associated with this orchid, as the older hollow pseudobulbs split and give them a home, much like the genus *Myrmecophila*.

Caularthron is a small genus of perhaps 3 medium sized epiphytic species in tropical South America and Trinidad that are similar to *Encyclias* (but without an enclosed column) and happily hybridise with other members of the *Cattleya* family. Bright light, ample water while growing with a lessening in the winter and regular fertilizing ensures a healthy, regularly blooming plant.

Editor's note:

In June Donna and I holidayed in Singapore and what a trip. We loved the city and all it had to offer. We spent a very busy 6 days trying to see as much as we could but there is so much that we might just have to go back. The Botanic Gardens was wonderful but a must see when in Singapore is the Gardens by the Bay. I have included a few photos that I thought you might like to see of the gardens.
